

**Sub: Causality assessment report of 296 reported Serious AEFI cases, approved by National AEFI Committee**

The Immunization Division of MOHFW has taken several steps to improve the National AEFI surveillance system, both the quality of investigation of cases at state level and their causality assessment at national level. Considering the importance and critical nature of the task, SOPs for causality assessment (CA) have been laid down as quality assurance. The CA subcommittee is housed at Lady Harding Medical College which is also the National AEFI Technical Collaborating Centre. The second round of Causality Assessment is undertaken by this sub-committee.

AEFI deaths, attributed to the vaccine or programme error are reviewed again by a specially constituted review panel comprising of the chairs of the 4 subcommittees of the National AEFI Committee (i.e. Causality assessment, investigation, media and laboratory subcommittees) chaired by Chairman, National AEFI committee. The causality assessment reports are presented to the National AEFI Committee.

The results of the Causality Assessment for 296 cases completed over the past few months after thorough review, deliberation and approval by the National AEFI Committee is placed below (The anonymized line list of the causality assessment done by the National AEFI Committee as annexure). Among these 296 cases, none of the reported AEFI deaths have found to have association with immunization.

Most of the reported serious AEFIs are Immunization Anxiety related reactions (111) and none have been found to be due to quality defect in manufacturing vaccines.

**CAUSALITY CLASSIFICATION OF 296 AEFI CASES REVIEWED AND APPROVED BY THE NATIONAL AEFI COMMITTEE  
19TH-20TH MAY 2015 - (CHENNAI-TAMIL NADU )**

**A1 - VACCINE PRODUCT RELATED REACTION**

**A2 - VACCINE QUALITY DEFECT RELATED REACTION**

**A3 - IMMUNIZATION ERROR RELATED REACTION**

**A4 - IMMUNIZATION ANXIETY RELATED REACTION**

**B1 - TEMPORAL RELATIONSHIP IS CONSISTENT BUT THERE IS INSUFFICIENT DEFINITIVE EVIDENCE FOR VACCINE CAUSING EVENT**

**B2 - REVIEWING FACTORS RESULT IN CONFLICTING TRENDS OF CONSISTENCY AND INCONSISTENCY WITH CAUSAL ASSOCIATION TO IMMUNIZATION**

**C - COINCIDENTAL - UNDERLYING OR EMERGING CONDITION(s), OR CONDITIONS CAUSED BY EXPOSURE TO SOMETHING OTHER THAN VACCINE**

**D - UNCLASSIFIABLE**
