

Quality Policy

We are committed to provide quality services in surveillance programme of **Adverse Event Following Immunization** in India and also to monitor the quality and safety of vaccines and the vaccination processes by working with other stakeholders.

We shall endeavor to constantly and actively collaborate with all immunization stakeholders to build confidence of community in vaccines and immunization programme.

AEFI Surveillance Programme is committed to early detection, management, reporting, investigation and feedback on AEFIs to various stakeholders of immunization programme.

Dr. M. K. Aggarwal

**Deputy Commissioner (UIP),
MoHFW, Government of India**

Goals and Objective of AEFI Surveillance

1. Promptly detect, report and respond to AEFI.
2. Identify unusually high rates of AEFI related to a specific vaccine lot/brand.
3. Promptly address programmatic errors through implementation of corrective measures.
4. Estimate serious AEFI rates in the population and compare these with local and global data.
5. Identify signals of unexpected adverse events and generate new hypotheses about these events that must be confirmed by planned studies and laboratory investigations.

Dr. M. K. Aggarwal
