The 100 Days Tuberculosis Campaign is in full swing across Meghalaya, and health providers are going above and beyond to ensure no one is left behind!
In Hallidayganj HWC and Gimegre A Village, West Garo Hills, dedicated health teams conducted Non-Communicable Diseases (NCD) screenings, all while spreading awareness about early TB detection and timely treatment.
The health providers across the State are braving tough terrains and long journeys to reach even the most remote ... See more

Tuberculosis (TB) is a bacterial infection that can affect the lungs, brain, kidneys, spine, and other parts of the body. It's spread through the air when people with TB cough, sneeze, or spit. TB is preventable and curable with antibiotics, but it can be fatal if left untreated.
Students of PM SHRI Kendriya Vidyalaya, Bondamunda took pledge today to make our nation TB free and do the responsible act to stop its spread.
