

# AIIMS, Bibinagar, Telangana

## AIIMS, RAINBOW PARK

### GARBAGE TO GREEN PROJECT

- It is said that “If you plant a tree, you plant a hope”. To cultivate this hope all over the nation, Executive Director of AIIMS Bibinagar Hyderabad, Dr. Vikas Bhatia proposed a very unique concept of “AIIMS Rainbow Park”, It’s a Garbage to Green project wherein a dry, unused waste land is converted into a beautiful garden.
- The site identified was an area adjacent to the main OPD foyer of AIIMS, Bibinagar. The area was full of shrubs, waste materials and pests before, however, with the help of support staff and faculty members over a period of 6 months a remarkable transformation was made. The rainbow park as it stands now is a pleasant place with a sit out, fountain and a variety of plants cultivated in it.

## BEST OUT OF WASTE

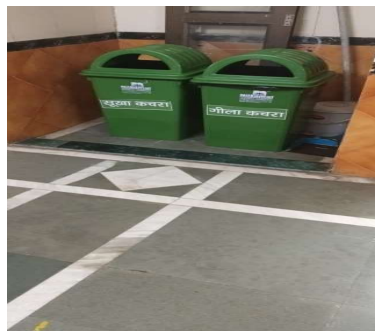

Ways to Dispose of Waste without Harming the Environment

Waste: Dry leaves ->Kitchen Waste(Vegetables , waste food, Egg Shells, etc)

Daily

- Cleaning of Institute Compound is Done
- Garbage is collected Tree leave from compound
- Waste from Kitchen (Canteen, Departments, Corridor (From General public )
- Segregation
- Scrutiny
- Then collected in a field Garden Area (Dumping side)
- Water is sprinkled on the collected material to keep it moist.
- Kept for 45 Days for decomposing (anaerobic digestion\*)

\*the decomposition of sewage or other organic waste material by anaerobic microorganisms, typically used as a means of waste disposal

# AIIMS, Rishikesh

- Under scope and mandate Special 2.0 campaign from 2nd October to 31st October 2022, for enhancing swachhata in the institutes, Hospital round was taken on Saturday, 1 October 2022 and the area in front of radiation oncology was found to have Junk material, Rusted Benches which were not properly arranged, Cobwebs/Bird Nest/Seepage on wall and lot of dust.
- The identified area is cleaned and made free of waste material by our dedicated housekeeping staff.
- Most of the benches are repaired and reorganized with the help of engineering staff.
- Walls of the area are cleaned, and painting process is initiated, and Floor tiles are repaired.
- To regularly monitor and control the use of tobacco products/ prohibit vehicle parking in the concerned area the security guard is placed and instructed to be more vigilant.
- Cobwebs/Bird Nest/ Dust/Seepage on wall (which was due leakage from AC vent, for the same the pipe extension is put) are cleaned.
- Unwanted vegetation/weeds in the area are removed, more plants are planted and the process of putting grass in the ground is initiated.
- The process of putting shades in patient's sitting area is initiated.
- Patients are made aware of their responsibility of keeping the health facility clean.
- Sessions on steps of hand hygiene and Spill management are organized for the concerned staff.
- More Dustbins have been placed.
